

Lock Forend and striker to suit dormakaba MS2600

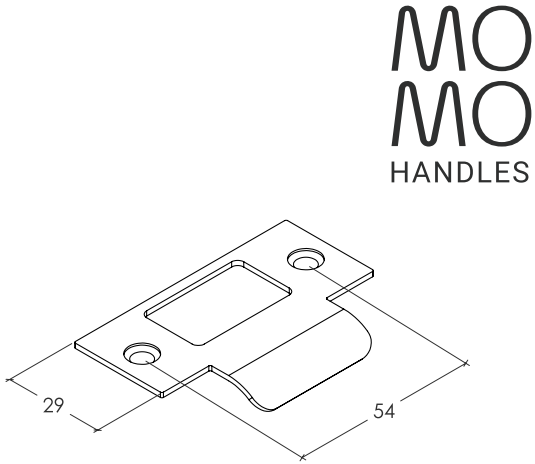

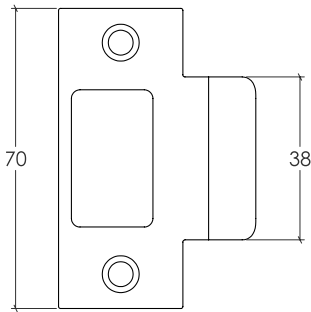

Designed for use with compatible Dormakaba MS2600 and MS2900 Series locks, the Momo Handles Dormakaba Accessory Kit provides the coordinated components required to complete the installation alongside your selected Momo lever handle and oval cylinder escutcheon.

The kit includes a colour-matched forend plate and strike plate, together with the required fixing screws, brass sleeves and installation components. Available in all seven Momo solid brass finishes, it creates a cohesive and considered finish across your architectural door hardware.

Lock to be purchased separately
